NATIONAL ENGINEERS WEEK  
February 19 - 25, 1984

I am delighted to send my greeting to all members of the engineering profession as well as all members and officers of the San Fernando Valley Engineers' Council as you celebrate your 29th annual National Engineers' Week. This is a celebration in which all Americans should join in appreciation of the great contributions of engineers to our society.

This annual event presents an opportunity to reflect on the tremendous contributions engineers have made to American progress. All our citizens acknowledge the critical role engineers have played in maintaining our technological excellence through the years.

The decade ahead will be marked by growing competition in science and technology among the nations of the world. How well we respond to this challenge will affect both our national security and our economic progress. We know that our industrial base and research institutions are unmatched anywhere else in the world. We look to the engineering community, operating through the American free enterprise system that gave birth to the modern technological era, to utilize this nation's unique resources to create new industries and to strengthen old ones.

At the same time, I urge all of you to recognize the great importance of education, especially in science and technology, to our future. Each of us must do all we can to encourage excellence in education.

In commemoration of this special week, I want to extend my best wishes for a bright future to engineers across America.

*Ronald Reagan*

ENGINEERING '84 MERIT AWARDS

- Paul C. Dennies, Chief Program Engineer, Space Shuttle Main Engine Rocketdyne Division, Rockwell International Canoga Park, California  
  
"For sustained outstanding managerial and technical leadership and direction of rocket engine propulsion systems and exceptional contributions to the United States Space Program and Missile and Defense Programs."
- Joey Fairchild, Division Engineer  
Engineering Laboratories  
Lockheed California Company  
Burbank, California  
  
"For outstanding contributions and leadership in advanced vehicle systems, avionics, flight science laboratories, and research which impact our nation's future."
- Timothy William Fox, Department Head  
Mechanical and Chemical Engineering Department  
California State University Northridge  
Northridge, California  
  
"Outstanding contributions to industry, education and government programs which interface industry technology programs for the 80's and 90's."
- Frank P. Garofalow, Pacific Regional Manager  
Sandvik Inc.  
Irvine, California  
  
"Outstanding innovative contributions to advanced productivity, tooling materials, and advanced machinability data for conventional and automated systems for today and tomorrow."
- Allen C. Haggerty, Executive Vice President, Production Operations  
Hughes Helicopters, Inc.  
Culver City, California  
  
"Outstanding achievements in advanced manufacturing systems, equipment and processes which impact productivity for the 80's and 90's."

PETER RECCHIA OMNI MEMORIAL AWARD - 1984

The movies have their Oscar; the television industry has its Emmy; and the San Fernando Valley Engineers' Council presents for the twelfth time, the Engineering Omni Award. This was presented to the Engineer of the Year - San Fernando Valley - 1973, and thereafter, to each succeeding Engineer of the Year - San Fernando Valley. This beautiful, original trophy was conceived, designed and produced by Peter Recchia, P.E., SME, AIIE. Mr. Recchia was a dedicated supporter of the engineering community. When he passed away, the Omni Award was renamed, "Peter Recchia Omni Memorial Award."
